EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:

- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:

- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:

- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:

- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:

- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:

- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:

- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52:

- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 53:

- B-Binders, seconds, and brokes
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:

- B-Binders
- C-Fillers
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:

- B-Binders
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:

- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:

- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Inventory of Leaf Tobacco Up Slightly From Year Ago

Leaf tobacco inventories 1/ reported on hand by dealers and manufacturers in the United States and Puerto Rico totaled 3,571 million pounds (farm-sales-weight) as of July 1, 1951 2/, an increase of 62 million from the previous July 1 level. It is estimated that slightly over 50 million pounds from the 1950 production entered stocks during the second quarter. These additions consisted mainly of Maryland and Puerto Rican leaf, but included Pennsylvania seedleaf, Ohio filler and smaller amounts of other cigar types.

For the southern types, flue-cured stocks were up 5 percent from the previous July 1, but Burley tobacco holdings showed a 3 percent decrease and Maryland stocks were near the same level. The fire-cured leaf inventory was down 11 percent from a year earlier, and dark air-cured 8 percent. For cigar leaf, stocks of the filler types were up 4 percent, binder types increased 7 percent and shade-grown 2 percent. The inventories of foreign-grown cigarette tobaccos (Turkish and other) showed a sharp increase of 21 percent.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

2/ The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE LEAF STOCKS

Flue-cured Stocks Up; Burley Down Slightly; Foreign-grown Cigarette Leaf Markedly Higher Compared With A Year Ago

Flue-cured tobacco stocks of 1,558 million pounds reported as of July 1, 1951, were up 73 million from the previous July 1. Disappearance of flue-cured tobacco, as indicated by production estimates and changes in stocks, totaled 1,184 million pounds during the marketing year July 1950-June 1951. Indicated domestic consumption of around 755 to 760 million pounds surpassed last year's previously high level of usage by 5 percent. Exports of flue-cured leaf were around 425 to 430 million pounds which was a slight decrease from the 446 million pounds exported during the previous marketing year.

Holdings of Burley tobacco totaled 1,120 million pounds this July 1, a decrease of 32 million from a year ago.

Sales of the 1950 Maryland tobacco crop began in May and around 18.5 million pounds were marketed by June 30 from an estimated production of 40 million pounds. Sales during the same quarter last year were 26.9 million pounds. Stocks of Maryland leaf this July 1 were 52.2, about the same as on hand a year earlier. However, less of the new crop was in stocks this July 1.

Stocks of foreign-grown cigarette and smoking (Turkish and other) on July 1, 1951 amounted to 179.8 million pounds for an increase of 31.7 million from a year ago and the largest stocks of type 90 on record. Holdings of domestic aromatic tobacco as of July 1 were around 0.6 million pounds.

DARK TOBACCO STOCKS

Lower Stocks of Dark Tobaccos

Fire-cured tobacco stocks of 159.8 million pounds were well below holdings as of the previous July 1 of 180.0 million pounds. The greatest decrease was in holdings of Type 23 although stocks of type 22 were down considerably from a year earlier. On the other hand, the inventory of type 21 was up slightly. Stocks of fire-cured tobacco were divided as follows: Virginia fire-cured 27.0 million pounds, Eastern District Kentucky and Tennessee fire-cured 96.9 million, Western District 35.5 million and Henderson Stemming 0.3 million.

Stocks of dark air-cured tobacco showed a marked decline compared with July 1 a year ago. Holdings this July 1 were 80.4 million pounds compared with 87.6 million a year earlier. Stocks of type 35 were down 3.0 million pounds, type 36 down 3.9 million and type 37 slightly lower compared with the previous July 1. Holdings of One Sucker as of July 1, 1951 totaled 43.9 million pounds, Green River 32.9 million, and Virginia sun-cured 3.6 million.

CIGAR LEAF STOCKS

Larger Stocks of Cigar Leaf

Stocks of domestic grown cigar leaf tobacco including Puerto Rican were 402.1 million pounds (farm-sales-weight) as of July 1, 1951, compared with 383.7 million pounds a year ago. Holdings of most types were larger than on last July 1 but exceptions were Types 46, 54 and 61. Stocks of foreign-grown cigar leaf of 16.5 million pounds were 1.1 million less than a year earlier.

Cigar filler stocks were reported as 225.8 million pounds this July 1, about 8.2 million pounds more than on the same date **last year**. Stocks of cigar filler according to types and changes from the previous July 1 were as follows: Pennsylvania Seedleaf, 136.1 million pounds, up 7.1 million; Ohio filler, 33.0 million, up 2.9 million; and Puerto Rican filler, 56.7 million, down 1.9 million. Of the Puerto Rican stocks, 34.9 million pounds were in Puerto Rico. The bulk of the 1950-51 Puerto Rican crop, estimated at 25.5 million pounds, entered stocks during the second quarter.

Cigar-binder tobacco stocks this July 1 were 156.4 million pounds compared with 146.6 million a year ago. Larger holdings of Type 55 account for about half of the increase in the cigar binder types but stocks of the other binder types except type 54 were up from the previous July 1. Stocks of cigar-binder leaf consisted of 32.1 million pounds of Connecticut Valley Broadleaf, 30.2 million of Connecticut Valley Havana Seed, 2.4 million of New York and Pennsylvania Havana Seed, 41.9 million of Southern Wisconsin and 49.7 million of Northern Wisconsin.

The inventories of shade-grown tobacco totaled 19.9 million pounds on July 1, 1951, compared with 19.4 million pounds a year earlier. An increase of 1.0 million pounds in holdings of Type 62 more than compensated for a slight decrease in stocks of Type 61. Stocks of Connecticut Valley shade were 13.0 million pounds and Georgia-Florida shade 6.9 million this July 1. As indicated by production estimates and changes in stocks, disappearance of shade tobacco during the past marketing year (July-June basis), totaled 14.6 million pounds compared with 14.4 during the previous year. The disappearance consisted of 9.2 million pounds of type 61 and 5.4 million of type 62.

Stocks of Cuban (Havana) leaf of 15.9 million pounds were slightly lower than those on hand a year ago. Holdings of Sumatra and Java leaf were 0.4 million pounds, Philippine Islands (Manila) 0.1 million and miscellaneous foreign-grown less than 0.1 million.

Table 1.--Average percentage of weight remaining after handling, sweating, drying, and stemming for all types of tobacco, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent 1/

SOUTHERN TYPES (11-37)

Type	No.	Yield realized from farm-sales weight to:				Stemming				Factors used to multiply by

MISCELLANEOUS DOMESTIC AND FOREIGN-GROWN TYPES (71-90)

Type	No.	Percent	Percent	Percent	Percent	Percent	Percent	Percent	Percent	Percent	Percent
Miscellaneous Domestic	72-73	--	--	--	--	--	--	--	--	5 1.333	5 1.09
Foreign-grown cigar leaf	81-84	--	--	--	--	--	--	--	--	5 1.205	(6)
Foreign-grown cigarette and smoking tobacco	90	--	--	--	--	--	--	--	--	5 1.205	(6)

1 Information in this table taken from U. S. Department of Agriculture Circular 435. Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937. 2 Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating and storage. 3 Ohio-Miami Valley filler types of tobacco packed in cases by growers before delivery. 4 See footnote 1 on page 5 for conversion factor to the farm-sales weight equivalent. 5 Tentative factor. 6 Factor has not been determined.

Table 2.--Stocks of leaf tobacco owned by dealers and manufacturers, by types, converted to a farm-sales-weight equivalent, July 1, 1951, compared with other quarters 1/

FARM-SALES WEIGHT

1/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for July 1, 1951 are as follows: Type 41, 107; Types 42-44, 107; Type 51, 107; Type 52, 106; Type 53, 109; Type 54, 106; Type 55, 107; Type 56, 123; Type 61, 111; Type 62, 114. July 1, 1951 figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 5 on page 14.

3/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in April 1 report.

Table 3.-Production, stocks, supply, disappearance on a farm-sales-weight basis, and price of specified types, 1946-51 1/

FLUE-CURED, TYPES 11-14

Marketing year: beginning July 1	Production	Carry-over (stocks July 1)	Total supply	Disappearance (supply less carry-over following year)	Average price to growers

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ Subject to revision.

3/ July 1 estimate, U. S. Crop Reporting Board.

Table 4.-Stocks of leaf tobacco, by types and groups of grades, owned by dealers and manufacturers, July 1, 1951, compared with April 1, 1951 - Cont'd.
(REPORTED WEIGHT)

- 1/ Subject to revision.
- 2/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.
- 3/ Includes Puerto Rican on the Island, Type 46.
- 4/ Type 84.-Other foreign-grown all shown in the C group.
- 5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
- 6/ Type 77.-Domestic Aromatic formerly reported under Type 73.
- 7/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.
- * Revisions in April 1 report.

Table 5.-Stocks of leaf tobacco by types, showing separately quantities owned by dealers and manufacturers, July 1, 1951, compared with July 1, 1950 1/

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 5 on page 14.

5/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

Table 6.-Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, July 1, 1951, compared with other quarters ^{1/}

^{1/} These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1950, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

^{2/} Subject to revision.

^{3/} For explanation of stocks included in this classification see footnote 5 on page 14.

^{4/} Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in April 1 report.
